The Toughest Cable You Can Buy!

Tri-Max drain cleaning cable protects against kinking and corrosion three ways for extended cable life

The toughest drain and sewer equipment cable on the market is **Tri-Max** three-element cable. This stress-relieved 3/4" or 5/8" cable protects against kinking and corrosion with a unique three-layer design.

Tri-Max cable contains (1) an inner core made from right-hand wound galvanized aircraft wire, (2) a protective plastic sheath to guard against rust and corrosion, and (3) a tough, long-lasting outer layer of left-hand wound, stress-relieved music-type wire offering superb quality and tensile strength.

Top quality **Tri-Max** cable is available with either ***straight slot*** or ***keyhole end fittings*** to fit most drain cleaning machines. Contact Electric Eel for complete price information.

Note: Always refer to operator's manual and safety instructions before operating any drain and sewer cleaning equipment.
